- Citrix certification: What's in it for you
- NEW! CCEE and CCIA for Virtualization: The industry's first end-to-end virtualization certifications

Organizations are increasingly dependent on highly-skilled IT professionals to improve efficiency and reduce costs. Citrix Education is here to provide support with robust technical training courses and hands-on labs. Plus, our certifications recognize and reward real-world skills to help you gain a competitive advantage in the job market.

Citrix Training

Discover what Citrix training can do for you

Today, virtual computing is revolutionizing the technology landscape and improving efficiency, while reducing costs for organizations of all types and sizes. Citrix training is building relevant, hands-on virtual computing skills that provide real value in the job market.

Citrix training is here to:

- **Empower you to successfully implement your Citrix product** - Our training focuses on the most critical features required to optimally implement and support Citrix solutions.
- **Prepare you for a Citrix certification** - Most Citrix training courses are tied to a certification and focus on in-demand virtualization and networking skills.
- **Sharpen your skills, even on a limited travel budget** - Our training methods are designed to be flexible and accommodate your schedule and travel budget. If you can't make it in to the classroom, we offer many hands-on technical training options delivered online, whether live with an instructor or self-paced.
- **Address your organization's specific needs** - Citrix training can be tailored to meet your organization's unique needs and time frames. Our custom training is delivered on-site by highly skilled Citrix Certified Instructors™.

On a limited travel budget? Try online training!

If you're on a limited budget and can't travel to a classroom, enroll in one of the following online training options.

Self-paced online training features:

- Online learning 24x7x365, from any computer, at your own pace
- Robust technical curriculum, with training simulations
- 30-day access to a live, hosted lab environment for hands-on learning

Virtual instructor-led training features:

- Online learning from a live instructor - join the class using Web-based meeting software
- Live instructor lecture and real-time 'question and answer'
- Real-time support - instructors can remotely control your workstation
- Access to a hosted Citrix lab environment for hands-on learning during class time

Training is also available for Citrix Access Gateway™, Citrix Branch Repeater™, Citrix EdgeSight™, Citrix Application Firewall™ and Citrix Password Manager™. View a complete list of Citrix training courses at www.citrixeducation.com

Citrix Certification

Validate in-demand virtualization skills

Citrix certifications demonstrate your value to employers, hiring managers or clients, while giving you the IT knowledge and skills to perform with confidence. Our certifications are organized into three tiers based on job roles - **Administrator**, **Engineer**, or **Architect**, and cover virtually all Citrix products.

Citrix certification: What's in it for you?

Whether you are just starting your career, are an experienced Citrix professional, or an IT manager, Citrix certification provides the following benefits:

- **Competitive advantage** - Citrix credentials validate an elite set of IT skills. According to industry research, the adoption of virtualization is expanding rapidly. Our ground-breaking virtualization-based certifications, the Citrix Certified Enterprise Engineer™ (CCEE) and Citrix Certified Integration Architect™ (CCIA) for Virtualization, meet this demand and give you an edge in the job market.
- **Career advancement** - Citrix certifications are well-recognized, highly respected and open doors for new career opportunities. They align with real-world job roles and focus on the skills required to increase job security and advance to the next level. Plus, they positively impact salary – in fact, the CCIA consistently pays more than the average of all 209 certifications captured by Foote Partners' IT Skills and Certifications Pay Index.
- **Proven staff knowledge and performance** - Industry research has proven that the number of relevant certifications an IT team holds is directly related to the organization's performance, cost savings and goal attainment. Organizations with certified IT teams see increased efficiency by spending less time deploying and fixing solutions, and more time improving them.
- **Special privileges, discounts and logo apparel** - Citrix certified individuals receive discounts and recognition at Citrix events, as well as exclusive access to select beta training courses and exams. Additionally, once you become certified, you can show off your credential with certification logo apparel from the Citrix Certification Shop, www.citrix.com/certshop.

NEW! CCEE and CCIA for Virtualization: The industry's first end-to-end virtualization certifications

The Citrix Certified Enterprise Engineer (CCEE) and Citrix Certified Integration Architect (CCIA) deliver:

- Alignment with real-world engineer and architect job roles
- Update paths with streamlined requirements for existing advanced certificants
- Certification on industry-recognized solutions, enhancing relevancy and recognition
- 3 year validity - guaranteed!
